IN THE CLAIMS

Please amend claims 1, 16, 18, and 21. Set forth below are the amended claims in clean form. Also, the amended claims in the marked up form are included in the attached Appendix.

1. (Twice Amended) A set of promoter sequences suitable for optimizing the expression of a gene in a selected organism or group of organisms, said set of promoter sequences covering, with respect to promoter strength for said gene, a range of promoter activities which is within a range from the weakest activity that is detectable by inserting each of the set of promoters into a vector comprising a promoterless β -galactosidase reporter gene system, transforming a host strain with the resulting vector and cultivating the transformed host strain with the resulting vector and cultivating the transformed host strain to express β -
